

ABSTRACT OF THE DISCLOSURE

A computer program for a controlling apparatus intended
5 to control an image forming apparatus, executes a procedure
of confirming each program running on the controlling
apparatus. The computer program executes procedure of judging
a program, which is not included in a preset list of programs
that can be run to control the image forming apparatus among
10 programs whose running states have been confirmed, as an
illegal program resulting from computer virus infection. The
illegal program is automatically deleted or isolated.
